ACON Attends the American Association of Clinical Chemistry (AACC) Annual Meeting in Atlanta, George

At this year’s 2015 Annual Meeting & Clinical Laboratory Exposition (AACC), ACON was very proud to showcase our growing product lines to more than 17,000 attendees. During the 5 day event, ACON displayed and demonstrated our leading point-of-care testing systems to experts and clinicians from the United States and around the world. ACON’s booth was one of the 720 exhibitors that filled the George World Congress Center show floor and displayed 360 degree views for meetings and discussions with our customers and other guests.

Some of the highlights from the 2015 AACC Annual Meeting included a method that uses fingernail clippings instead of blood to diagnose and monitor diabetes and the first lab-on-cartridge device that can perform all of the clinical tests that labs routinely order as part of year physicals.
